PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in Java programming, object-oriented programming, SQL, backend development, REST APIs, and software development practices. Experienced in building and documenting backend-oriented applications, working with databases, authentication, APIs, and modular architectures. Strong understanding of problem solving, debugging, SDLC, and application development with an interest in building scalable Java-based backend solutions.

EDUCATION

SRM University of Science and Technology 2022 – 2026
B.Tech in Computer Science and Engineering *CGPA: 9.30 / 10*

Narayana Junior College, Hyderabad 2020 – 2022
Intermediate – MPC Stream *Grade: 9.00 / 10*

Dilsukhnagar Public School, Hyderabad 2019 – 2020
S.S.C *Grade: 10.00 / 10*

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, HTML, CSS
Core Java: OOP, Classes and Objects, Inheritance, Encapsulation, Polymorphism, Exception Handling, Collections
Backend: REST APIs, Backend Development, Authentication, Microservices Concepts
Databases: SQL, PostgreSQL, Database Management, Query Development
Tools: Git, GitHub, Docker, Postman, Jupyter, VS Code, Jira
Development: SDLC, Agile, Debugging, Testing, Version Control, API Documentation

EXPERIENCE

Research Intern – MIT Square Oct 2024 – Mar 2025
Remote

- Collaborated on software-oriented research projects involving data collection, preprocessing, analysis, and structured problem solving.
- Prepared technical documentation and reports while supporting project development and presentation activities.
- Worked with structured datasets and analytical workflows to support project requirements and technical deliverables.

PROJECTS

QueryGenie – NLP-to-SQL Analytics Platform *Backend / API Development*

- Developed a backend-oriented analytics application that converts natural language queries into SQL queries and presents analytical results.
- Designed modular components for query processing, execution, authentication, and result rendering.
- Worked with REST API concepts, database operations, authentication, and structured backend workflows.

Book Rental Platform – Microservices Architecture

- Developed a modular backend architecture separating user, inventory, and rental-related services.
- Implemented authentication workflows and API documentation while working with relational database operations.
- Applied concepts of modular design, service communication, API development, and containerized deployment.

Serverless File Converter – AWS Lambda

- Developed an event-driven application for file conversion using cloud-based services and API integration.
- Worked with API-based upload workflows, backend processing, and monitoring concepts.

CERTIFICATIONS

Google Cloud Arcade Games Champion – GCP 2024
Supervised Machine Learning – Scaler Aug 2024
Database Management Systems – NPTEL, IIT Kharagpur May 2024
NLP & Text Mining for Beginners – Simplilearn / SkillUp Mar 2025

LEADERSHIP & COMMUNITY

Junior Developer – Weights & Biases (W&B) Community

- Contributed to community initiatives involving reproducible workflows, technical dashboards, and collaborative development activities.
- Participated in technical community sessions and collaborated with professionals across the developer and machine learning ecosystem.
